Pet Insurance

No one will argue that pets are not expensive, and they are more expensive when they get sick or need veterinary care. Do you have a plan if and when your pet gets sick?

Pet insurance can provide a safety net for you and your pet so that you are not caught in the position of having to choose between exceeding your budget or letting your beloved pet go without the care he or she needs.

Some plans will provide pre-set reimbursements on services, while others reimburse some percentage of the cost of care. It is important to carefully read over the policy to know exactly what is and is not covered and to compare different policies before buying. That way you can purchase the one that will serve the needs of you and your pet.

Here are two websites that can help you compare policies:

- Pet-insurance-university.com
- Petinsurancereview.com
- Petsinsuranceguideus.com
